Open to: Remote (Worldwide) | On-site Karachi | Visa Sponsorship - Relocation

Professional Summary

Frontend-focused Software Engineer with 6+ years of experience building scalable, enterprise-grade web applications using React, TypeScript, Angular, and Node.js. Proven track record across SaaS products, AI-integrated platforms, real-time communication systems, and cross-platform mobile development with React Native and Ionic. Experienced in leading frontend architecture, mentoring developers, and collaborating with cross-functional teams in both on-site and remote environments.

Technical Skills

Frontend: React, TypeScript, JavaScript (ES6+), Angular, Redux, Redux Toolkit, RTK Query, Material UI, HTML5, CSS3, SASS

Backend: Node.js, Express.js, REST APIs, MongoDB, Firebase

Tools: Git, GitHub, Postman, Swagger, Jira, Copilot

Mobile: React Native, Ionic 5

Others: AI-Assisted Engineering, AI-Augmented Code Review and Debugging, Prompt Engineering for Code generation and Architecture

Professional Experience

Software Engineer | Contour Software Pvt Ltd | Karachi, Pakistan

Jul 2023 – Present

- Developed and maintained responsive web applications using React for the frontend, ensuring a seamless user experience across devices.
- Implemented state management solutions using Redux and redux-form to manage form state and improve application performance.

- Collaborated with backend teams utilizing Ruby on Rails to develop RESTful APIs supporting frontend functionalities.
- Maintained 5+ React modules across a large-scale enterprise SaaS platform.
- Reduced legacy code complexity by revamping 3+ modules using modern React standards.
- Integrated third-party services and APIs to enhance application capabilities, including user authentication and authorization processes.
- Leveraged GitHub Copilot for module revamps and code quality improvements, streamlining legacy codebases and reducing repetitive development tasks.
- Participated in code reviews and team meetings, contributing to discussions on best practices and project architecture.
- Conducted API testing and documentation using Postman and Swagger.

MERN Stack Developer | INVIXIBLE PVT LTD | Remote

Dec 2021 – Jul 2023

- Led frontend development using ReactJS to enhance UI design and improve user experiences while integrating APIs.
- Implemented new features and addressed bugs within the existing product.
- Collaborated with backend developers using NodeJS and MongoDB to create and integrate APIs effectively.
- Reduced state-related bug reports by ~30% by migrating to Redux Toolkit + RTK Query.
- Conducted code reviews and engaged in pair programming.
- Documented best practices and coding guidelines.
- Worked on complex forms, socket handling, and user interaction enhancements.
- Mentored 3 junior developers through weekly knowledge-sharing sessions.

MEAN Stack Developer | Hulhub Pvt Ltd | Karachi, Pakistan

Aug 2021 – Dec 2021

- Developed a chat solution that connects agents with customers in real-time using the MEAN stack.
- Implemented a calling feature using Twilio.
- Tackled product enhancements and bug fixes.
- Engaged in the development of ticket management module features.
- Participated in code reviews and requirement-gathering sessions.

Frontend Developer | Avolox Pvt Ltd | Karachi, Pakistan

Aug 2020 – Aug 2021

- Contributed to ERP products using Angular, focusing on feature implementation and bug resolution.
- Developed and maintained new modules and improved existing functionalities.
- Implemented calling and chat module functionalities.
- Conducted unit testing and code reviews.

Angular Developer | Ciphers Lab Pvt Ltd | Karachi, Pakistan

Dec 2019 – Aug 2020

- Contributed to front-end development of web and mobile applications.
- Integrated APIs in Ionic and Angular applications.
- Implemented complex forms and state management.
- Worked on web sockets and push notifications.
- Contributed to multilingual application support.

Projects

Project Name: HiiBo

- Personal AI assistant making LLM tools accessible to non-technical users
 - Built prompt assistance, memory management, and customizable AI experiences
 - Tech: React, TypeScript, Redux RTK Query, AI/LLM APIs
- URL : <https://chat.hiibo.app/>

Project Name: DocFlow

- Role-based bank document workflow system with 5-tier approval chain (branch → branch authorizer → reviewer → department authorizer → archive)
 - Built automatic round-robin document routing across regional reviewers
 - Implemented immutable audit trail logging every approve/reject/return/transfer action
 - Built admin console for user, branch, and region management with role-specific onboarding flows
 - Added secure file uploads via Supabase Storage with time-limited signed URLs
 - Tech: Next.js, TailwindCSS, Supabase, PostgreSQL RLS
- URL: <https://docflow-tawny.vercel.app/>
Test admin credentials – Email: admin@test.com , Password: aDmin123@

Education

Bachelor of Science in Computer Engineering
Sir Syed University of Engineering and Technology
Score: 3.29 CGPA
2016-2019
